

Snow Day

A man who loved living free
Tried to put his trust in me
He broke his right mirror in Hackensack, New Jersey
A woman who I adore
Well, she separated from the show
She made her way through 520 miles of water

Can I get a break here?
First in line
Waiting for a snow day all the time
Waiting on the weather, man
My volume's up
I can't just wait another month
Jazz!

You gotta love some peace of mind
When you're keeping it between the lines
But open up the shade, let the sunshine in
Let's have ourselves a time
Everybody's staying home
It's the greatest story ever told
Baby you had better believed we had it coming

Can I get a break here?
First in line
Waiting for a snow day all the time
Waiting on the weather, man
My volume's up
I can't just wait another month
